

# THE CHINOOK ADVANCE

Vol. 22

Chinook, Alberta, Thursday, May 18th, 1939

NO

## Lightning Strikes Banner Hardware

What might have proved to be a very serious fire in Chinook, on Tuesday evening, when the lightning struck the flag pole of the Banner Hardware store, splintering the top of it. It also struck a socket of the electric light, catching fire to one of the windows of the residence, which is only a short distance from the store. Fortunately Mr. and Mrs. Lee were in the house and were able to smother the fire out quickly.

## The Ladies' Card Club

### Met Tuesday Evening

The Ladies' Card Club met Tuesday evening at the home of Mrs. Targett. The honors were shared by Mrs. Cooley and Mrs. Lee. The club will meet next week at the home of Mrs. Peyton.

Born—To Mr. and Mrs. W. Thompson in the Esler Hospital, a son.

Mr. and Mrs. Sterling of Youngstown, were town visitors Wednesday.

Miss Jean MacIntosh, Calgary nurse, is visiting for a few days at the home of Mrs. W. Gallagher.

## LOCAL NEWS

Mr. McCrea, of the "Hanna Herald" was a pleasant caller at the "Advance Office" last week.

Mrs. Geo. Connell is visiting with her daughter, Mrs. Claude Brace in Calgary for a few weeks.

Mrs. H. R. King spent the day on Wednesday visiting with friends in town, before leaving for Gidsworth, Sask., where she will visit at the home of her daughter.

Mr. and Mrs. P. Demaree, of Calgary, are Chinook visitors this week.

Mr. James, M. L. A., in company with some other M. L. A's, were Chinook visitors on Tuesday afternoon.

Mr. E. C. Pfeiffer is spending a few days in Calgary this week.

Mr. L. Nollan, Pool Elevator Superintendent, was in town Wednesday.

Mr. Drysdale, C. N. R. pump repair man, was in town this week.

Mr. MacLaren of Oyen has been doing some phone repair work in town this week.

## ROUND ABOUT TOWN

Our hometown boys appeared to be exceptionally pleased that they won the ball game last week end. Here's to you for the same success in future games.

Did you see the pretty young lady that our famous "bachel" took to supper Saturday night. We are curious to know if he drove her home too.

The H S students certainly portray the modern attitude of changeability. We were rather amazed at the young couple at the entertainment last week. But they made a good pair nevertheless.

'Stars may come and stars may go' but last Sunday one 'Star' shone most brightly for some of our inmates. Yes - they say a change is better than a rest.

We hear that one of our junior citizens has taken a keen interest for Cereal. No doubt the 'object of her affection' will be a frequent visitor in Chinook.

Well we can't say that a certain young man was unfaithful last Saturday night to his lady friend, when the latter was home. He must be more serious than the average youth of these times.

## Week End Grocery Specials

|                      |               |      |

## Discipline And The Child

The problem of the wayward boy or the difficult girl is an age-old one. There are few families who escape it entirely in the course of a lifetime and in every community there are families in which it is an acute one most of the time until the children reach the age when they must fend for themselves without parental control or assistance.

Up to the age of adolescence, in most cases, the problem does not appear to be a serious one. While the children are quite young they are kept from serious harm apparently without great difficulty, because their actions and even their words and moods are subject to close supervision in the home and the school.

It is those years when boys and girls first experience the stirrings within them of approaching manhood and womanhood that the danger zone is approached. About that time the youth of both sexes are prone to retire within themselves, to nurse their own secrets, to draw away from parental control and, in short, to use a popular term, to live their own lives. They have emerged from the chrysalis of childhood and are eager to soar into an unknown realm.

All that is perfectly natural. The time comes when fledgling birds must leave their nests and the young cubs must leave the home lair to fare forth "on their own." That is the most dangerous period in the life of bird or beast. Young and inexperienced and without the strength and wisdom of their forebears they face a world full of terrors which they are not equipped to combat, except for such warnings as instinct may convey and for such lessons as they may have learned from their parents.

It is even so with the young of humankind. They, too, are launched unprepared into a world full of pitfalls, unless they have been equipped to face the dangers of life by parents and guardians who have been wise enough to train them with an eye to the future and have pursued this difficult task with understanding and sympathy.

## A Difficult Task

And this task is not an easy one, but it is a duty which must be faced by every parent worthy of the name if the resultant product is to be a credit to the family, the community and the nation, and unless this is the outcome, parenthood can be written off as a rank failure.

It is a difficult task because every child represents a separate problem requiring special treatment and that entails careful study and much thought. Even though the educational system tends to press the youth of the country into a common mould they are not born alike and that is too often overlooked both by parents and teachers.

It is a difficult task because training is a continuous process from the time the child is weaned until he or she is ready to leave the shelter of the home roof and that means that methods to be adopted must be such as to trend always in the direction of the main objective, with such variations as may be necessary to conform to the age, the temperament and the individuality of each child.

As already indicated, the process of successful training commences at the outset of life. It is too late to begin at the age of adolescence. The confidence and understanding between parent and child which is so essential to successful training in the teen years has either been engendered or lost by the time that difficult period of life is reached, and if it has been lost by that time it is difficult if not impossible to recapture it.

All of this does not mean that the child must be mollycoddled, nor does it mean that he or she must be ruled by big stick methods. A sure method to turn out a misfit is to allow the child to do what he or she wants on all occasions and at all times. An equally sure way is to repress the child by harsh treatment.

It does not mean that punishment for offences is to be avoided. Children have a keen sense of justice and punishment does not leave a searing sense of resentment, if it is deserved, if it is reasonable and if it is made to fit the offence and if proper account is taken of motive and temperament.

## Corporal Punishment?

Discussions on child training invariably lead to a review of the question of corporal punishment of children—to spank or not to spank. On this phase of the training problem it might not be amiss to quote here what J. D. Griffin had to say on the subject in a recent issue of "Health" in which he offered the following comment:

"What kind of people do we really want our children to become? The various measures we employ in child training are but means to an end. And so I believe it is perfectly possible to raise children so that they develop wholesome, vigorous personalities and become decent, efficient citizens without using corporal punishment at all. It is possible, but it is not without some danger. . . . The occasional spanking may actually be a healthy procedure. It clears the air and relieves pent-up emotional tensions. It frequently leaves the parents with the conviction that they have done their duty righteously. In any event such a procedure is usually far less damaging to the wholesome development of the child's personality than the oppression of continual nagging of parents."

The thoughts of youth are long, long thoughts, but they must be understood if relationships between parent and child are to be satisfactory and if the child is to be brought up in the way he should go.

## Years Spent In Writing

Milton planned Paradise Lost when he was 32, brooded over it until he was 50, then spent seven years of his blindness on its composition. Gray devoted eight years to his brief Elegy in a Country Churchyard. The Divine Comedy occupied Dante for his 35th year until his death at 66. Goethe wrote the first draft of Faust at 20 and finished the last at 80.

## Knew Little About Cards

John Omwake, former president and chairman of the board of the United States Playing Card Company, died in Cincinnati, aged 85. Mr. Omwake, although often described as the world's largest manufacturer of cards, knew no card tricks and had very little knowledge of how to play with them.

There are 74,000,000 acres of cultivated land in Canada, 55,700,000 acres of which are in the Prairie Provinces. Range and unimproved pasture land in Canada comprises 40,000,000 acres, 33,000,000 acres being in the Prairie Provinces.

The Dominion of Canada supplied about 50 per cent. of the asbestos imports of Belgium, which is its fourth best market for the product.

A gallon of the average material of which the earth is made would weigh 55 pounds.

## A Protective Measure

## United States May Establish Twelve-Mile Zone In Coastal Waters

The state department, it was learned, is investigating the national defence value of establishing a 12-mile zone of territorial waters around the United States.

This extension of the present three-mile limit of coastal control was proposed to the department by Chairman Key Pittman (Dem.-Nevada) of the Senate foreign relations committee. He said officials had advised him the proposition was under consideration but that it was complicated by international questions since the department would prefer to take the step with other nations.

"If we allow submarine and warships within three miles of our shore during a foreign war," Senator Pittman said, "some of our ships will be sunk. And we don't want war within three miles of our shore."

He said the proposal would have peacetime benefits also, since it would give the United States greater control over the Alaskan fishing banks. American interests there, he declared, are in constant conflict with those of Japanese fishermen who stretch their nets just outside the three-mile limit.

Announcing he did not contemplate offering any legislation unless the state department requested it, Mr. Pittman said the three-mile limit might be extended either by proclamation or by treaty.

The United States set up a 12-mile zone by treaty with Great Britain during prohibition in order to make run-runner patrols more effective. That line was agreed upon because 12 miles was about an hour's run from shore. The three-mile zone dates back to the time when a cannon would shoot about that distance. It long has been accepted in international law as the extent of territorial waters.

## SELECTED RECIPES

## BUTTERSCOTCH FUDGE CAKE

(1 egg and 2 egg yolks)

2 1/2 cups sifted Swans Down Cake Flour

2 1/2 teaspoons Culmet Baking Powder

3/4 teaspoon salt

1/2 cup butter or other shortening

1 1/2 cups sugar

1 egg, unbeaten

2 egg yolks, unbeaten

3 squares Baker's Unsweetened Chocolate, melted

3/4 cup milk

1 teaspoon vanilla

1/2 cup boiling water

Sift flour once, measure, add baking powder, salt, and soda, and sift together three times. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy.

Add eggs and egg yolks, one at a time, beating well after each addition.

Chocolate and blend. Add flour, alternately with milk, a small amount at a time, beating after each addition until smooth.

Add boiling water, beating quickly and thoroughly. Bake in two greased deep 9-inch layer pans in moderate oven (350 degrees F.) 30 to 35 minutes, or until done. Spread Butterscotch Fudge Frosting between layers and on top and sides of cake. Decorate top with pecan halves. Double recipe for three 10-inch layers.

3 cups finely crumbled Shredded Wheat Biscuits (4-5 biscuits)

3/4 cup melted butter

1 to 3 cups oysters with their liquor

4 tablespoons lemon juice

2 tablespoons minced parsley

3/4 teaspoon salt

1/2 teaspoon white pepper

Mix all ingredients and add a little stock or boiling water, if too dry. Use to stuff a roasting chicken. To stuff a turkey, etc., increase this recipe.

## OYSTER STUFFING

3 cups finely crumbled Shredded Wheat Biscuits (4-5 biscuits)

3/4 cup melted butter

1 to 3 cups oysters with their liquor

4 tablespoons lemon juice

2 tablespoons minced parsley

3/4 teaspoon salt

1/2 teaspoon white pepper

Mix all ingredients and add a little stock or boiling water, if too dry. Use to stuff a roasting chicken. To stuff a turkey, etc., increase this recipe.

## Alberta Road Plan

Expenditures Of \$625,000 On Main Highways This Season

Dominion-provincial proposals for expenditure of \$625,000 on Alberta's main highways this season have been approved by Ottawa, it was announced by Hon. W. A. Fallon, Alberta minister of public works.

The expenditures approved by the Dominion include \$500,000 to be shared equally by Alberta and the Dominion to be spent on improving and surfacing highways in the central and southern districts of the province.

In addition there is \$75,000, two-thirds of which will be contributed by the Dominion and one-third by Alberta, for mining roads developments.

## IF YOU FEEL SUNK

Read this and cheer up

Are you so blue that life is no longer worth living? Do you cry easily? Do you feel low, morose, depressed—just absolutely blue? Then here's a good news for you in case you need a good general system tonic. It's called Nature's Compound, and it's the most famous Dr. E. F. Pinkham's Vegetable Compound. Let its wholesome herbs and roots help Nature build up more physical resistance and tone up your system, so that it can more easily throw off the "blues" and give more energy to enjoy life. MILLIONS of women have depended upon this Compound and have saved the life word along to friends and neighbors, and to their children. Why not take Pinkham's Compound and go "feeling blue"?

## Means Huge Saving

## Great Britain Finds Past Time Is Invaluable To Country

Although time-pieces of a kind have been known for about 2,000 years, the first being the sundial and the second the "clepsydra," a device like an egg-boiler through which water dripped, clocks did not come into general use until around the year 1700. But as man governed his hours by daylight and darkness there were world-wide variations of time, and even in the enlightened British Isles there was much difference and confusion less than a century ago, there being no standard times, cities establishing their own times and only the railways operating on Greenwich time. The real inventor of regular times was the Scottish-born Canadian, Sir Sanford Fleming, chief engineer of the Canadian Pacific Railway, who propounded his scheme in 1878. It was not until an international conference in 1884 that his ideas were universally adopted, and on this side of the Atlantic five time zones were established and in Europe there are three—Greenwich, mid-European and East-European.

Daylight Saving was the invention of William Willett, London builder, who enjoyed a morning ride in the woods near his home in Kent, and regretted that so many people should be asleep when the sun was shining so beautifully, and retired indoors in the evening because of early darkness. He promoted his plan in 1908, but did not live to see it accepted, and it was not until the World War, when the need arose for conserving coal resources, that the British Government made it compulsory. Inauguration took place on May 21, 1916.

The idea is permanent there now, and it is estimated that the saving to the country during each session it is in operation amounts to \$15,000,000. To that must be added incalculable benefits in outdoors exercise and health.

## Total Sum Is Large

Federal Government Has Paid \$345,861.70 For Relief to Nine Years

Federal relief distribution since the first relief act was passed in 1930 until last March 31 totalled \$345,861.70, exclusive of loans to the provinces, it was shown in a report tabled in the House of Commons from the Dominion commissioner of unemployment relief, Harry Herford.

Included in the total are many sums spent by Federal departments, but the larger share is made up of grants to the provinces. Grants to the provinces of unemployment relief from 1930 to last March 31, were: Prince Edward Island, \$1,261,116; Nova Scotia, \$7,553,963; New Brunswick, \$5,221,544; Quebec, \$56,837,334; Ontario, \$91,212,025; Manitoba, \$24,134,629; Saskatchewan, \$52,791,144; Alberta, \$16,848,811; British Columbia, \$24,208,668.

Appropriations to the Department of Agriculture under the various relief acts have totalled \$28,026,087 since 1930, more than \$21,000,000 being spent in 1937 when drought conditions in the West were acute.

A source of poultry food is derived from the flesh of sharks.

of the famous Scottish liners  
"ATHENIA" and "LETITIA"  
to England, Ireland and Scotland

Following the policy of keeping "abreast of the times", the Donaldson Atlantic Line have thoroughly reconditioned and improved the accommodation in all three classes of these vessels.

The new features include—

- Hot and cold running water in all Cabin and Tourist staterooms, and in most Third Class cabins.
- Beds instead of berths.
- Controlled ventilation throughout.
- Enlarged and rebuilt cabin staterooms in "Athenia".
- New rooms with private bath on the "Athenia" following similar improvements made in the "Letitia".

## NOTE THESE LOW RATES

Cabin from \$132.00; Tourist \$118.00; Third \$91.00

## Rescue Awards

Parchment Certificates Issued For Rescuing People From Drowning

Awards of parchment certificates for rescuing persons from drowning to two persons in Manitoba are announced by the Royal Canadian Humane Association. The awards go to Annie Margaret Elviss, Swan River, who saved Richard W. Zinger from drowning at Swan River, Aug. 10, 1935, and Joseph H. Hall, Selkirk, for the rescue of Rosie Rinkin, whose life was in danger in the Red river at Selkirk, July 16, 1938.

Allison Clifford Fawcett, of Rainy River, Ont., also got an award for the rescue of Clifford van Numan from drowning at Rainy River, Oct. 2.

There is no fun in being the granary of the world if the other countries will not buy our wheat.

## Used Same Flag

The Eiffel Tower in Paris is 50 years old. To celebrate the occasion, the flag that was hoisted at its summit 50 years ago was run up. It was hoisted by M. Francois Carnot, who 50 years ago performed the same ceremony at the inauguration.

## For Eczema - - Skin Troubles

Make up your mind today that you are going to give your skin a real chance to get well. Go to any good drug store and get an original bottle of Moore's Emerald Oil—it takes many days because it is highly concentrated. The very first application will give you relief—the itching of Eczema is instantly stopped—troughs dry up and the skin begins to heal. The same is true of Itch, a very few days. Better's Itch, Salt Rashes and other skin troubles. Remember that Moore's Emerald Oil is a clean, powerful, penetrating, Antiseptic Oil that does not stain or leave a greasy residue. Complete satisfaction or money back.

WND Service

CHAPTER IX.—Continued

Then he reached her, and she knew immediately and entirely what it meant, for he caught her into an embrace of urgency and iron and bent his bare yellow head and kissed her again, and the kiss on the earth differed only from the one at an altitude of three thousand feet in facility and duration.

Sarah Lynn was held in a vise; she could not move her body or her lips, but her mind ran and leapt and soared.

Conrad Jordan was calling them, walking toward them.

"Gunnar," he said casually, "Lo Roy will hop the Hermod back to the field for you. We're all lunching with the old lady, and she is eager to get started. Mind driving my car?" Gunnar asked me to ride with him.

"Wait!" the youth said imperatively. "A thing has happened—"

"Well, I should say so!" Jordan agreed genially. "Miss Sarah Lynn Dana, daring young aviatrix, completed a sensational parachute jump with all the nerve and skill of a professional."

But the Norseman was not to be deflected. "Always I have said fliers shall not marry." He looked at Sarah Lynn again with grave resentment, sighed, lifted his hands, palms upward, let them drop. "I make now the discovery that I love this girl."

"I think," Sarah Lynn murmured with a sudden accession of shyness, "I ought to ride back with Great-granny!" She ran away swiftly to the car.

Gunnar stood still in a clump of madrones when he and Sarah Lynn were out walking after lunch.

"Now we talk," he announced stultily.

Sarah Lynn halted before him, standing with folded hands.

"Love I did not want. Love, I said always, was a weakness."

"I know," she nodded meekly. "Freedom I wanted; freedom like birds in the air." He seemed to be accusing her of having ruined his plans.

"I'm sorry," Sarah Lynn said. "I mean, I'm sorry you're so furious about it and so miserable, but after

all—she tried to sound reasonable (and detached—"birds do come down sometimes, don't they, and build nests and—"

He shrugged his lean shoulders. His mouth looked beaten, baffled. "Everything blocking the way, I have conquered. Now this conquers me. I know it. Never can I lose you. If I fly across the ocean, still you are there. My life breaks in pieces. What now can I do?"

Sarah Lynn thought wistfully of one thing at least, and apparently the same idea occurred to him, for his long arms shot out and caught her to him in a straining hug.

"So then! It is finished!" he lamented.

It was beginning, she exulted to herself.

He released her and took her thin shoulders in a tense grip. "There remains a thing for you to tell," he said imperatively. "How have you the deep knowledge of kissing?"

"Oh, but I haven't, really!" "Yet, you said you could tell—"

"Well, of course—boys—it always happens. But it doesn't count at all," she said earnestly. "Duncan was always trying, but—"

"From this day!"—the ultimatum sounded—"you jump no more; you kiss no more."

"Very well," Sarah Lynn agreed in a small voice.

He frowned and sighed. "To-night I speak to your father."

"Oh, Gunnar, not to-night, please! Let's wait a little—"

He shook his head. "We quickly marry. We go to Norway."

They go to Norway. She sat down limply with her back against a pungent laurel. "Gunnar! It takes my breath!"

He sat down beside her. "It is my country. Also, I have there the good chance."

"My mother—" Sarah Lynn said in a stricken voice.

He disposed of her mother briskly. That was the way it happened to mothers: daughters grew large and made marriages and went away with their husbands.

Husbands! Marriages! Norway! The world was filled with strange and startling words.

"Gunnar, have you noticed that funny old thing on Uncle Lynn's wall—the pipe-rack in burnt wood, with the verses?"

He nodded. "Did you read it?"

"It matters not how strait the gate—"

"Yes, I have thought, 'But of course! It must be straight. How shall a gate be crooked?'"

"It's a different kind of straight, Gunnar! This means narrow. You know, in the Bible? 'the strait way.' A girl made that for Uncle Lynn, just after he knew he would sit still in a chair all his life, and he's kept it there all these years although he's not a sentimental person at all, and it looks so pathetic among his etchings and his beautiful books. He must have loved her, I think. That sort of poetry is terribly out of style, now."

"It matters not how strait the gate. How charged with punishments I am the master of my fate: I am the captain of my soul."

"Like hoop-skirts or bustles and bangs. People don't read—"

"That I like," Gunnar interrupted. "Captain of my soul. It is good."

"Yes. But the thing I'm thinking of is the 'strait gate,' Gunnar. That comes first, you see. And before I can think of Norway, and us, I must tell my mother and that will be the straightest gate in my life."

He laughed. "You jump over it! And I wait for you on the other side."

But Sarah Lynn shook her head. "No; you don't jump over strait gates. You crawl through."

Danavale was difficult for Sarah Lynn in those days. It was a joyful escape to have Conrad Jordan invited to a house-party at his Lake Tahoe lodge. He was staking an air tour to demonstrate the practicability of an airport at an elevation of over 6,000 feet in the High Sierras, and Gunnar Thorwald, Norwegian ace, making the fifteenth

## Goodbye, Blues on Ironing Day!

**\$1.00 FOR YOUR OLD IRON**

**Coleman SELF-HEATING Iron**

plane in the meet, gave international importance to the event.

Sarah Lynn rode with him in the Hermod, flying over the Santa Clara valley and the Sacramento. It was perfect flying weather, clear, bright, calm, with boundless visibility.

"This is the way our life is going to be," the girl told herself. In just a little space of time the trials and the tears would be over—beneath them, behind them.

Gunnar Thorwald was thrilled and stimulated; he had never seen him so alert and eager.

"This also I like!" He brought the Hermod, swift messenger of the gods, smoothly and silently to the earth and then, alighted, elated with the triumph of his project—15 shining ships of the air on the line at Rabe's field.

Conrad Jordan got to his feet and moved restlessly about the beautiful big room with its dark wood and mellow leather and hearty Navajos. It was evening.

"Play, please," Gunnar said from the hearth.

Conrad Jordan sat down at the piano and hunted through a pile of music.

The youth lifted himself on an elbow. "No! The music you have yourself made."

His host nodded. He had found the shabby notebook he was looking for and took out some clippings. Here's a thing I found in a paper—"The Feeling of Star."

Random lines; fellow jotted down bits of his favorites here and there. I've been meaning to work out something—he smoothed out the printed slip and read aloud: "I am in love with high, far-reaching places and this 'Space and the twelve clean winds of heaven'—"

He began to play, feeling his way among the notes, the chords.

Sarah Lynn leaned back in a great deep chair which made her seem childishly small, and the visitor, at himself flat again, his hands folded behind his yellow head.

"This was the one I liked," Jordan said, his fingers halting.

"But I shall go down from this airy space, this swift white peace, this stinging exultation; And time will close about me, and my soul stir to the rhythm of the daily round."

Yet, having known, life will not press so close. And always I shall feel time travel thin about me. For once I stood in the white windy presence of eternity."

(To Be Continued)

## Astronomical Mystery

Puff Ball Stars Present A New Problem To Scientists

McDonald Observatory was dedicated with announcement of discovery of new mystery—puff ball stars, which expand with a great flare of light and dim again all within one day.

The discovery, made recently at Harvard, was announced literally at the upper end of the great new telescope at Fort Davis, Texas, the 82-inch "eye" which will be operated jointly by University of Texas and University of Chicago.

Standing on the observing platform, Harvard's director, Dr. Harlow Shapley, told the new story to an audience sitting far below.

The new stars were observed near the outer edge of the small Magellanic cloud, a huge star world, nearly 1,000,000 light years away.

The reason the new stars puff up so rapidly is not yet clear. But it is indicated the puffing has something to do with the presumably smaller mass and less crowding of stars in this vicinity. The puff ball stars in the past have been used by astronomers to discover what goes on in the unknown centres of star "universes" like the milky way.

One of the most exciting night clubs in Hungary has seats in corners which at the press of a button will lift two people slowly to the ceiling where they may converse privately.

## Atlantic's New Deep Spot

An Undersea Chasm Near The Island Of Puerto Rico

A new deepest hole in the Atlantic ocean, over five miles deep, was discovered February 14 by the U.S.S. Milwaukee while she was participating in the recent fleet problem. The Milwaukee's sounding was made with a catometer in the Puerto Rico Trough, an undersea chasm near the island of Puerto Rico, which possesses already the reputation of having the greatest depths in the Atlantic ocean.

Nares Deep within the trough was named for Admiral George Strong Nares (1831-1915), who as commander of H.M.S. Challenger recorded a sounding in that area of 3,875 fathoms on March 26, 1873. Rear Admiral Albert Gleaves, United States Navy, in command of the U.S.S. Dolphin, obtained a sounding of 4,625 fathoms in the deep in 1902. This was the record depth until the Milwaukee found a hole nearly a half-mile deeper.

The Milwaukee's sounding was 4,780 fathoms, uncorrected for salinity, pressure and temperature. When corrected the depth will be in excess of 5,000 fathoms, and will be marked on new charts as "Milwaukee Depth."—U.S. Army and Navy Journal.

## He Saved His Money

Stonemason In England Donates \$2,000 To A Hospital

John Snow, 90-year-old stonemason, of Oxford, Eng., astonished his neighbors by giving \$2,000 to a hospital. He had never earned more than \$3.75 a week, but he and his wife had saved.

Snow, known locally as "the second Lord Nuffield," told the real Lord Nuffield, millionaire philanthropist, he and his wife had never taken a holiday of more than one day at a time—a long time ago.

## Long-Lived Beetle

One Wireworm Species Can Live For Seven Years Without Food

Insects can survive many of the extremes of heat and cold, drought and flood. Prof. R. H. Strickland, of the University of Alberta states that there is a species of wireworm beetle that can live for seven years without food. It is long lived and depending upon weather conditions it may mature in four years, or it may take nine years to complete its life cycle. In a season favorable to its development it may clean out a field in one year.

# Low-cost Remodelling

THAT COMBINES  
BEAUTY AND  
SAFETY!

The economical, practical, and safe way to remodel or build is to specify GYPROC for all walls and ceilings.

- ECONOMICAL—because PERMANENT. GYPROC will not warp, shrink or swell.
- EASY TO HANDLE—cuts and nails easily as lumber.
- SAFE because FIREPROOF.
- PRACTICAL because of INVISIBLE JOINTS—This means smooth walls with no ugly seams or unnecessary panel strips.
- ANY TYPE OF DECORATION—The smooth surfaces take paint, calcimine, wallpaper, textures—any decoration you wish : : : and you can change it as often as you like.
- INEXPENSIVE—despite its exclusive advantages!

Be sure you get genuine GYPROC—you can identify it by the Green Stripe on the edge of every board.

GYPROC is available everywhere in Canada. Ask your local dealer in Builders' Supplies and Lumber, or send the coupon below for free booklet.

## More Royal Visit News

May the twenty-sixth will mark one of the greatest days in the history of the city of Calgary. 200,000 people are expected there for the visit of their Majesties. extensive arrangements have been made to accommodate those people who will come to the city for the occasion. It is believed that hotel and room accommodation will be sufficient even for the huge crowd expected. Bleachers are available, and may be reserved by writing to the Royal Visit committee in Calgary.

Many, of course, will not be able to come to Calgary, and so intricate arrangements have been made for a word picture of all the happenings. CFAC will combine its facilities with those of the other Calgary stations, CFCN and CJCN to broadcast the entire proceedings, and to "carry" the Canadian Broadcasting Corporation's commentary from the Indian Display site. Pat Freeman, Program Director of CFAC will be one of the

commentators on this CBC pick-up".

On the local broadcast there will be four different microphone placements. One will be at the C.P.R. depot, which will carry a commentary of the arrival of the Royal Train and attendant ceremonies. A 'Mike' situated at the Toronto General Trusts Building will pick up the Royal Procession along Eighth Avenue to Fifth Street West.

Mr. and Mrs. H. W. Butts and family of Hanna, visited with friends in Chinook Thursday evening.

Mr. and Mrs. W. McFalls of Hanna motored to Chinook Thursday evening where they visited at the home of the latter's parents, Mr. and Mrs. T. Gilbertson.

## Locomotive of Royal Train Ready

Scheduled for the biggest job ever assigned to a steam locomotive, Canadian Pacific engine 2353, photographed at the Angus Shops in Montreal, is ready to haul Their Majesties the King and Queen on their 3,000-mile trip across Canada. The royal tour will mark the first time one engine has made a continuous journey of this length, and 2353's record will not be equalled on the tour.

Specially re-fitted and decorated for the occasion the big Canadian Pacific locomotive is a mass of shining stainless steel, royal blue, silver and gold. The semi-stream-

lined engine bears the royal arms over the headlight which has been sunk flush with the front of the boiler-casing; Imperial Crowns decorate each running board; the crest of the Canadian Pacific appears beneath the window of the cab and, on the tender, the royal arms four feet high are blazoned in relief.

The general decorative scheme comprises a background of deep blue on the underframe, smokebox, front of engine and all marginal work on engine and tender. The sides of tender, cab and running boards are painted Royal Blue.

A panel of aluminum leaf laid in diagonal squares matching the panel on the cars of the royal train extends half way on the tender. The panel is outlined in gold.

The jacket on the locomotive, handrails on it and the tender and other trim is of stainless steel. Gold leaf has been employed on the engine numbers.

Engineer Eugene Leclerc, of Quebec, who was fireman on the royal train in 1901, will be the first Canadian engineer. He has been in regular Canadian Pacific service between Quebec and Montreal for approximately 48 years.

## School Festival of

Cereal-Chinook Sub-Local

The elimination Festival of the school children of the Cereal-Chinook Sub-Local was held in Cereal, Friday, May 12th with Chinook, Cereal and Lanfine schools participating. There were seventy four entries in all and competitions were held in two halls during the afternoon. Rev. Mr. Whaley and Mr. and Mrs. Donaldson of Scotfield were the adjudicators.

The first and second of each competition with the exception of plays when only the first will go to Oyen to take part in the final Festival on Friday, May 19th. A very enjoyable performance, put on by those who won first prize was held in the evening.

The following is the list of winners who will go to Oyen to compete in the final festival:
